

Model specification currently on file are available by request,
Consult factory for complete details.

Explanation of Model Numbers Common to all Tovel Forklifts:

TS = Vertical Lift Mast.
 TL = Telescopic Boom.

Numeric breakdown :

1st. No. = Lifting capacity in pounds.
 2nd. set of No. = Wheels driven and Wheels Steer
 3rd. set of No. = Lift Height in feet.

An example: TS 6-44-28 is a Vertical Mast, 6,000 pound capacity,
 4 wheel drive & steer, 28 foot lift height.

Lift heights are optional, custom heights available upon request for quote.
 For standard lift heights and option mast consult with factory.
